

**Together AMPAC Fine Chemicals (USA) and SK biotek (South Korea and Ireland)  
offer an expanded value proposition in the worldwide CDMO space.**

AMPAC Fine Chemicals (Virginia Plant)

SK biotek (Daejeon Plant)

AMPAC Fine Chemicals 'AFC' (recently acquired by SK Holdings) and SK biotek now offer expanded CDMO services across three continents, and with six manufacturing sites and one dedicated Analytical Testing facility, offer comprehensive capabilities that support all phases of drug development and commercialization.

AFC and SK provide best in class cGMP-compliant technologies including Simulated Moving Bed chromatography (SMB) at all scales, low-temperature continuous flow technology, high potency API manufacturing (HPAPI) in dedicated facilities and the leading experience base in energetic and hazardous chemistries, all based on years of successful campaigns across multiple commercial drugs.

Dr. Aslam Malik, Chief Executive Officer of AFC states; "As a sister company with SK biotek under the SK Holdings banner, we can offer a broad global supply chain, access to world-class development and manufacturing of intermediates and APIs, as well as state of the art analytical services to provide final API release in Ireland, the US, and South Korea."

Dr. Junku Park, Chief Executive Officer of SK biotek shares: "We are proud to welcome AFC into our SK Family. We compliment AFC's heritage in the pharmaceutical fine chemicals space and we will serve to extend our support to all of our existing and new customers worldwide."

AMPAC Fine Chemicals and SK biotek are wholly owned subsidiaries of SK Holdings and operate as independent business entities within the SK Holding's portfolio.

## **ABOUT AMPAC FINE CHEMICALS**

AFC is a U.S.-based company with demonstrated capabilities in process development, scale-up, and cGMP commercial production of active pharmaceutical ingredients and registered intermediates for pharmaceutical and biotechnology customers. Its specially engineered facilities and experienced staff allow AFC to safely produce highly energetic compounds at commercial scale. AFC's other technology platforms include production of highly potent compounds, continuous processes and industrial-scale

chromatographic separation using simulated moving bed chromatography. In addition, AMPAC Analytical also provides testing services to the pharmaceutical industry. AFC's operations are located in Rancho Cordova & El Dorado Hills CA, La Porte, TX and Petersburg, VA.
